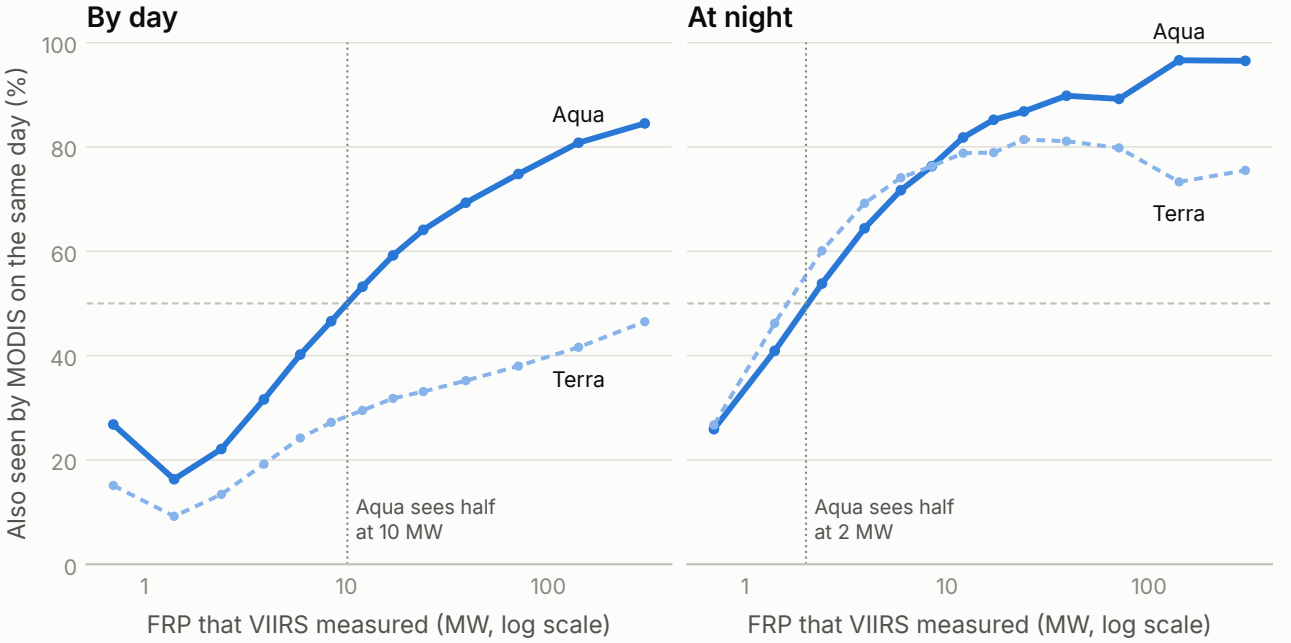
MODIS sees strong fires and misses most weak ones



Suomi NPP 375 m hotspots on 10 test areas in 2019 with a clear MODIS view. MODIS saw the fire when its daily map (the strongest of all passes) shows fire in the 3 by 3 window of 1 km cells around it. Source: NASA FIRMS (VIIRS 375 m), MOD14A1 and MYD14A1 (MODIS C6.1); analysis: Fire Harmony
